Engine Division

Canada - Engine Dyno

Engine model: White Superior 2416

Power 3200 BHP

Speed 1200 RPM

FACTS IN BRIEF

- The engine was built by Ironline Compression in their Nisku Facility
- The Engine was built for a customer over seas, this is the 2nd one they have completed.
- The last time they sent the engine to Houston to be ran on the dyno.

SOLUTION APPLIED

- Cost savings by being able to haul it from Nisku to Spruce Grove.
- Ironline Mechanics could be hands on. WPI Canada shop techs got to learn about a new kind of engine.
- WPI Canada has the only Natural Gas Dyno in Canada.
- WPI Canada also hot tanked all the parts for this build as well. Which in turn saves man hours on cleaning parts.

RESULTS

- WPI Canada helped with a cost control measure as Ironline did not have to pay for flights or hotels for there techs to be on site in Houston. The Ironline techs are all from the local area.
- The benefit for our customer was there was a lot of savings from having this completed locally.
